

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

**Lucas on the Osteology of the Spotted Tinamou.**—These 'Notes' \* point out briefly various osteological differences between the present species and some of its allies, as described and figured by Parker. Figures are given of the skull and pelvis. —J. A. A.

**Shufeldt on Bird Skulls and Sterna collected by Dr. Streets.**†—This report relates to the skulls and sterna of 13 species, mostly water-fowl. They include such various types as *Urinator*, *Daption*, *Pelecanoides*, *Cephus*, *Sula*, *Larus*, *Chlaephaga*, *Ardea*, *Nycticorax*, *Geococcyx*, and *Corvus*. The sternum of *Daption capensis*, with the shoulder girdle *in situ*, is figured; also the skulls of *Chlaephaga poliocephala*, *Nycticorax nycticorax naevius*, and *Corvus corax sinuatus*. —J. A. A.

**Chamberlain's 'Systematic Table of Canadian Birds.'**—We are in receipt of a second work by Mr. Montague Chamberlain on the birds of Canada. This, as the title‡ indicates, is a tabular list of the birds of Canada, as given in the same authors' 'Catalogue of Canadian birds.' The 'Systematic Table' is thus a 'check-list' and a 'table of higher groups' combined. The names of orders and suborders form subheadings, while the names of families, subfamilies, genera, subgenera, species, and subspecies, English names, and current numbers are arranged in parallel columns, each species or subspecies thus occupying a line running across the page. This arrangement requires a very broad page, but will doubtless subserve a useful purpose.

In the 'Introduction' to this work the author gives a condensed sketch of the history of American ornithology, particularly since 1859. He also notes the tendency to extreme conservatism respecting species and subspecies, etc., among Canadian naturalists as compared with those of the United States, a conservatism obviously resulting from a difference of attitude respecting the "evolution theory of the origin of species." This theory, Mr. Chamberlain says, while accepted by the greater part "of the scientific men of the United States . . . as an established fact, rather than a mere hypothesis," is considered "by Canadian students, as a rule, as 'not proven.'" This state of affairs seems to have suggested "that an association of Canadian ornithologists be organized, and that this society undertake the formulation of a system of classification and nomenclature which shall more truly reflect the ideas on the subject which are current in the Dominion." Mr. Chamberlain, while conceding that the formation of such an association might greatly promote the advancement of ornithol-
